Third Quarter 2024 Financial Results

Revenue was US\$198.6 million, representing an increase of 14.6% from US\$173.3 million in the same period of 2023.

- Revenue from Haidilao restaurant operations was US\$190.9 million, representing an increase of 14.5% from US\$166.7 million in the same period of 2023. The increase was mainly driven by (i) ongoing business expansion and increased brand influence; (ii) continuous efforts to increase guest visits and table turnover rate; and (iii) an increase in average spending per guest.
- Revenue from delivery business was US\$2.6 million, representing an increase of 8.3% from US\$2.4 million in the same period of 2023, primarily due to enhanced partnerships with local delivery platforms.
- Revenue from other business was US\$5.1 million, representing an increase of 21.4% from US\$4.2 million in the same period of 2023, driven by the growing popularity for hot pot condiment products and Haidilao-branded and sub-branded food products among local customers and retailers.

Raw materials and consumables used were US\$65.5 million, representing an increase of 9.9% from US\$59.6 million in the same period of 2023. As

a percentage of revenue, raw materials and consumables used decreased to 33.0% in the third quarter of 2024 from 34.4% in the same period of 2023.

Staff costs were US\$65.8 million, representing an increase of 15.2% from US\$57.1 million in the same period of 2023. As a percentage of revenue, staff costs accounted for 33.1%, compared to 32.9% in the same period of 2023. The increase was primarily due to (i) an increase in the number of employees in line with restaurant network expansion compared to the same period of 2023, and an increase in guest visits and table turnover rate; (ii) the Company's operational strategy of ensuring sufficient number of employees to provide superior customer experience; and (iii) an increase in statutory minimum wages in several countries.

Income from operations⁴ was US\$14.9 million, representing an increase of 52.0% from US\$9.8 million in the same period of 2023. Income from operation margin³ was 7.5%, compared to 5.7% in the same period of 2023. This increase in income from operations was mainly attributable to (i) an increase in revenue and table turnover rate as described above; and (ii) an improvement in operational efficiency, especially through optimization of the global supply chain and enhanced cost control.

Profit for the period was US\$37.7 million, compared to a loss of US\$1.4 million in the same period of 2023. This change was mainly due to (i) an increase in revenue driven by ongoing business expansion and continuous efforts in increasing guest visits and table turnover rate; (ii) an improvement in operational efficiency; and (iii) in addition to the aforementioned factors that affect the Company's income from operations, an increase in net foreign exchange gains of US\$34.6 million compared to the same period of 2023.

Basic and diluted net profit per share were both US\$0.06, compared to an approximating nil in the same period of 2023.
